Residential - Low Density

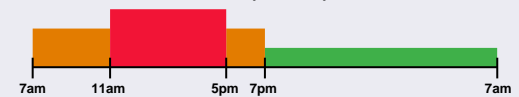

Electricity	\$199.89
This is the cost of generating the electricity you used this period. Usage is measured in kilowatt-hours (kWh) and depends on the wattage of devices you use and how long you use them. The Ontario Energy Board (OEB) sets the cost per kWh and the money collected goes directly to the electricity generators.	
Delivery	\$86.18
This is the cost of ensuring you have reliable power when you need it. Hydro One collects this money to build, maintain and operate the electricity infrastructure, which includes power lines, steel towers and wood poles covering 960,000 sq. km. A portion of this cost is fixed and a portion varies depending on the amount of electricity used.	
Regulatory Charges	\$10.47
The Independent Electricity System Operator (IESO) uses this money to manage electricity supply and demand in the province, which is necessary to ensure that there is enough electricity to meet Ontario's needs at all times.	
HST (87086-5821-RT0001)	\$38.55
8% Provincial Rebate	-\$23.72
Total of your electricity charges	\$311.37

Summer Cooling Tips

Two-thirds of your electricity use goes to home heating and cooling. As temperatures rise, consider ways to stay cool while conserving energy. Installing a ceiling fan or tuning-up your central air conditioner can help control your costs while helping you stay comfortable. For more tips to stay cool, visit www.HydroOne.com/StayCool

Energy Saving Tip

Phantom Power

Electronics use energy even when off. Plug them into power bars with timers or auto-shutoff to lower energy use.
