

## ***WHY BUY A RAIDEN STEEL BUILDING?***

### **BUILDING INFORMATION:**

- Solid I-Beam/structural steel construction; not webbed columns or beams.
- *ALL* Commercial grade structural steel.
- Quality Control - we manufacture all our components, not subletting components to other “manufacturers”.
  
- Sheeting is Galvalume-coated substrate that is prepped, and coated with silicon-polyester paint before fabrication – Boxed with each panel separated by a Styrofoam sheet / Commercial grade sheeting, 26 gauge, 80,000 PSI .
- Color trim work standard, not as a priced option.
- Roof System meets Underwriter’s Laboratories Class 90 wind uplift rating.
- Heavy and high strength, 16-20gauge Z ” girts and “Z” purlins.
- Our Gutters and Downspouts are all shrink wrapped to prevent damage.
- All our buildings come with engineered permit and construction drawings stamped by a registered, licensed engineer for the Province
- Raiden Steel goes above the local design codes “*most recent*” codes.
- All large door frame-outs are pre-engineered and factory located, not field located. This also helps keep erection costs down!
- Lower closure seal as well as the upper closure seal are standard!
- All Fasteners have a zinc-aluminum alloy head that cannot red rust
- Structural steel rafters used, not the weaker, space consuming trusses
- Our clips are welded on – Ease of Erection as well as time & money saving
- Every Part is packaged and labeled – Ease of erection
- We computer-stencil each piece with the description
- Factory Direct, not mixed and matched up

Remember, it is not just the Purchase of the Steel Building, but rather what happens in the post-purchase

period that makes Raiden Steel the Industry Leader

- #1 Rated Customer Service Department
